**Needs Assessment:**
* The school does not currently have a science lab
* Grades 9-12 learn from books but have no way to do any hands-on training
* The community is contributing over 60% of the cost of the project (total cost is $4,865). ODFL has committed to raising the other $1,767.

ODFL, in partnership with the Little Sisters Fund, will help equip a room at the Sunaula Secondary School in Makwanpur, to be used for practical science instruction. The school has 300 students in grades 9-12 with 15 dedicated teaching staff. The national science curriculum is taught to all students but the students cannot compete to go on to higher education because they do not have any practical science experience.

The room will be equipped with many different specimens (such as frogs, butterflies, octopus, leeches), chemicals, and science equipment (microscopes, hydrometer, lactometer, slides, etc.) allowing the teaching of Physics, Chemistry and Biology.

Soon the students will be learning practical science through hands-on experiments.
